E-Health is a hot topic in most of the countries in the world that everyone is working on. However, the central point in e-health system is a patient. E-Health is beneficial for everyone, as long it provides a fast, transparent and reliable data flow between all participants involved serving patient's needs.

Latvian Start-up Association

Latvian Startup Association "Startin.LV" was also founded in early 2016 as the first grassroots NGO advocating startup ecosystem agenda in the Baltic states, the first achievements include successful drafting and approval of Latvian Startup Law providing specific startup friendly reduced tax solutions and launching the first Latvian hackaton brand "Startup Slalom". Association has signed an agreement of cooperation with the Ministry of Economy of Latvia to work together towards Latvian startup ecosystem becoming first choice in the region. Riga has a thriving startup events scene with 2 major annual conferences (TechChill and Digital Freedom Festival), hundreds of meetups and smaller scale events and a host of co-working spaces, accelerators and incubators. Our current priorities are expanding global awareness of Baltic startup scene and building connections with the leading startup hubs in Europe and beyond – London, Berlin, Stockholm, Warsaw etc.

Lattelecom

Largest telecommunication carrier and integrator in Baltics. Founded in 1994, Lattelecom provides such IT services as electronic communication, telecommunication, designs and builds networks and Data Centres.

Data transfer solutions, development, introduction and arrangement of IT infrastructure in DC, call centre services, software development and support with further outsourcing give Lattelecom a right to be called an innovation partner for its clients.

Being a part of Lattelecom, four fully featured commercial Data Centres are in operation, among which there is the first and only DC in Eastern Europe certified under the standards TIER III FACILITY and TIER III DESIGN (Uptime Institute, USA). Furthermore, this DC is the first received a status of PCI DSS services provider in Baltics – this certificate confirms compliance with international standards applicable to any company, which processes, stores or transfers data of payment card holders and electronic financial transactions.

Services of Lattelecom DC are used by over 140 large companies of the USA, SIC and EU countries.
